

Launch your ideas off campus at local incubators and tech centers

In recent years Chicago has put itself on the world map as a technology hub and driver of the latest in innovation and capturing the entrepreneurial spirit.

Whether your major is Computer Engineering/Science (1871), Bioengineering (MATTER) or Mechanical/Electrical Engineering (mHUB) there is a local place where you can transform your idea into a reality or even help a start-up get their dream off the ground.

Many of the technology centers like 1871 and mHUB offer unique opportunities for students. UIC has a partnership with 1871. You can also arrange site visits. **Click on the organizations highlighted here to learn more from their websites.**

Chicago's center for technology and entrepreneurship
