

So much going on in the Engineering Career Center (ECC)

We know that the beginning of the school year can seem like a whirlwind. It is important to stay on top of your studies, but it is also important to be thinking about your career aspirations as it relates to internships, co-ops and full-time employment once you graduate. Do not let your career-minded goals slip as the school year progresses.

Each week the ECC will send out a digest of information including career-related events, companies who are hiring UIC engineering students, career development advice and so much more. We are here to help you with all things related to your future career in the engineering field.
