

About Contour View Technologies

Contour View Technologies has been developing a cloud-based application platform for the property management marketplace which redefines traditional methods of approaching the data captured by drones. The platform generates actionable reports and coordinated communication. As drones become the tool of choice for future property inspection purposes, there is a gap formed in supporting the process. The feature set of our platform fills that gap.

Position Overview: .NET Developer (Contract)

Contour View Technologies is looking for a mid-level .net developer with experience in developing and maintaining .Net applications for three months' contract position. The candidate will be responsible to work on customer facing projects as well as internal projects.

- The .NET Software developer will be responsible for developing innovative web applications
- Must be able perform design, coding, testing, implementation, and documentation of solutions
- Must be able to translate functional requirements into technical designs, and conversely to translate complex information into common terms
- Must be able to produce clean and testable code
- Must have knowledge or experience delivering software in a Software-as-a-Service (SaaS) environment

REQUIREMENTS

- .NET 4.5 / MVC 5 or higher
- GIT
- Web services including WCF, Restful API
- JQuery, AJAX, JavaScript, XML, Cascading Style Sheets (CSS), Responsive Design
- Entity Framework, Dependency Injection Framework
- Architectural design patterns, Clean code, SOLID
- Experience working with SQL Server databases
- Nice to have
- Kendo UI experience
- GIS / Geoserver / Map Server / Mapping experience
- Experience with Azure

Brief Cover Letter for Email, or Application Text Box

To the Development Team,

My name is Alan Turing and I am writing to apply for your contract position as a .NET Developer. As a master's degree student in computer engineering at the University of Illinois at Chicago (UIC), and I have the experience you are seeking. I am able to perform design, code, test, implement, and document solutions. I have experience with developing in .NET applications and have extensive experience with working with SQL server databases through my research assistant position at UIC.

Your start-up company sounds very exciting and I am thrilled for the opportunity to help you develop an innovative web application that bridges the gap between data captured from drone devices, and how it is reported to stakeholders. I would be delighted to speak with you further about my qualifications and background.

Thank you for your consideration, looking forward to hearing from you soon.

Best Regards,

Alan
