## SUMMARY

Electrical and Computer Engineering graduate student with strong technical and engineering skills in RF and Wireless Engineering. Possesses the analytical abilities necessary for designing, developing and testing RF circuits. Gained exposure to key concepts in modern wireless communications by training with major telecom company.

## EDUCATION

**University of Illinois at Chicago (UIC)** - Chicago, IL Expected: May 2025  
*Master of Science in Electrical and Computer Engineering* GPA: 3.63/4.0

**Vellore Institute of Technology (VIT)** - Vellore, India May 2023  
*Bachelor of Science in Electronic and Communication Engineering* GPA: 3.7/4.0

## TECHNICAL SKILLS

**Hardware:** Amplifiers, Mixers, RF Network Analyzers, RF Filters- SAW, BAW, Spectrum analyzers, Oscilloscopes, Resonant circuits, RF oscillators: PLL, Voltage-controlled oscillator, Transmitters.

**Software:** MATLAB, Simulink, LTSpice, AWR, Labview, FEKO, Altera Quartus, Atalanta (ATPG Tool), Microsoft Word, Excel, PowerPoint, C, C++ and Linux.

## LABORATORY WORK

**RF and Microwave Lab, Electrical and Computer Engineering Department, UIC** February 2023 – Present  
*Research Assistant*

- Conducted experiments using waveguide tees and directional couplers, impedance matching using smith charts, Frequency synthesizer characteristics measurement, S-Parameters and Slotted line measurements.
- Measurements were performed using FieldFox handheld RF and Microwave analyzer.

## INTERNSHIP EXPERIENCE

**Bharat Sanchar Nigam Limited (BSNL)** - Hyderabad Area, India October 2022 – December 2022  
*Engineering Intern*

- Obtained knowledge on key wireless concepts such as: - Digital Switching Principles (PCM Principles, CAS, CCS7 and latest switches in telecom industry), Fiber Optic Communication Principle (Concepts on SDH and DWDM), Mobile communication Principles (GSM, GPRS, EDGE, CDMA, 3G Technologies).
- Gained practical exposure on latest equipment's in telecom such as: - Telecom Switch- CDOT, OF Systems- SDH, DWDM, Mobile Equipment- 2G GSM, CDMA, 3G Mobile, Broadband, Networking Equipment, OFC Station, GSM/CDMA Installations.

## ACADEMIC PROJECTS

**Microstrip impedance matching circuit** September 2023 – Present

- Designed and simulated a circuit using FEKO by impedance matching on a microstrip line using single stub tuning method with the help of Smith charts; results were successfully obtained.

**Impedance matching circuit using FEKO** February 2023 – May 2023

- Matched microstrip line using single stub tuning method. Performed impedance matching using smith chart. Designed, developed and simulated microstrip line using FEKO software and obtained successful results.

**Low-pass elliptical filters by cascaded microstrip rectangular elements** September 2022 – December 2022

- Designed low-pass elliptical filters with cascaded microstrip rectangular elements using AWR Microwave Office.
- Demonstrated that pass band attenuation even lower than that of the prototype can be achieved through a simple adjusting procedure for compensating the reactance due to higher order resonant modes.

## ACHIEVEMENTS

- 1<sup>st</sup> prize in ECE technical quiz in inter-school quiz competition at Audishankara engineering college
- Placed in top 10 students for ECE RF engineering competition sponsored by IAETSD
