

Job Search Guide for International Engineering Students

Resources to Find Internships and Jobs:

- Engineering Career Center Website** – www.ecc.uic.edu
 - Read weekly newsletters, identify upcoming events on- and off-campus, and get advice on your job search.
- Create target list of companies using sites focused on global companies & visa sponsorship:** www.myvisajobs.com, www.h1bdata.info, & www.uniworldonline.com/search
- UICcareers.com** -- Most jobs posted on UIC Careers are from employers who specifically seek UIC talent. Set up email alerts for jobs and internships by clicking “Save this Search”
- Student Organizations and Professional Associations**
 - UIC has 30+ Engineering organizations. Build connections with students, alumni and employers that can help you learn about different career paths and opportunities: www.engineering.uic.edu/student-organizations
- Guide from International Student Careers** – tinyurl.com/yddeu7qq
- Networking**
 - VERY important in the US! Networking is the practice of developing professional relationships, which ideally lead to jobs or internships. The more that you network, the more you gain exposure to potential opportunities. Networking also exposes you to American culture and helps build your confidence. Ask your career center for help if you don’t know how to build your network.
 - Networking can be uncomfortable for anyone. Remember that networking is not about asking for a job. It’s about having conversations with professionals in your chosen field and maintaining relationships with them.
 - Where can I network?** Check the ECC Networking page for more info: ecc.uic.edu/networking/
